Excel Boats announce new Virago RiBs range

Excel Boats' new Virago 420 on display at the London Boat Show

Excel Boats has announced the launch of the new Virago range.

The Virago model range features an aluminium hull and deck for added strength and performance. A new console with high-spec trim and additional seating options will make heads turn while offering versatile options for users.

Being compact, lightweight and low maintenance, the new models are available in sizes from 2.9 to 4.2m.

Excel Boats owner Terry Wright said: "The new models are a result of first hand feedback from our customers combined with expert knowledge from our professional design team to ensure customers receive the ultimate experience on the water. The RIBs are light enough to manoeuvre with confidence with larger models able to hold up to four people for versatile use."
